JUSTIN DE GUZMAN   55 E. 10th Street, Apt. 611, New York, NY 10003 | (408) 892-6651

EMPLOYMENT HISTORY

Full Stack Engineer, Adcomm Mobile   February 2014 – Present

New York, NY

Adcomm Mobile is a startup that helps advertisers reach their target audience in emerging markets. Winner of the Columbia Engineering Pitch Competition, 2nd place at Princeton Entrepreneurship Pitch Competition, and currently a finalist at NYU's Gallatin Founder's Fund.

Junior Software Developer, Ultra-X Inc.   August 2012 – January 2014

Santa Clara, CA

Developed and designed XML/XSLT reports currently being used by Lenovo in their System Hardware Diagnostic Tool and System Profile Collection Tool. Rewrote the front-end interface for core company products to use AJAX, creating a more seamless user experience.

PROJECTS

Locstor.js

Locstor is an open source library that provides type safety for HTML5 Local Storage. Typically, local storage is a key/value store that only accepts strings. Locstor provides an interface over local storage that allows developers to store and retrieve any JavaScript supported data type.
